**Technology focus:** Safety of the human is the focus of our team of engineers and medical doctors. We analyze accidents and injuries and develop measures to reduce the injury risk.

**Next R&D project idea:** Automated transportation will not be 100% safe. Thus we aim for advanced risk assessment and occupant protection.

**Ideal R&D project partner?** Vehicle manufacturers and suppliers as well as (public) transport operators; partners who are concerned about the safety of vehicle occupants.

**References so far:** Vehicle manufacturers and suppliers, transport operators, government agencies (e.g. VW, Mercedes, Fiat, Rega, ASTRA, Alpinestars, SBB, VBZ, BVB)
